

Course Syllabus

COASTAL RESOURCES MANAGEMENT II

Printed by: jcedeno

Program: Oceanographic Engineering

1. Course number and name

OCEG1027 - COASTAL RESOURCES MANAGEMENT II

2. Credits and contact hours

2 credits and 3 contact hours

3. Instructor's course or coordinator's name

JONATHAN MARCELO CEDEÑO OVIEDO

4. Text book, title, author, and year

- COI-UNESCO / CPPS. Experiencias locales en el manejo costero integrado (2016)

5. Specific course information

- a. Brief description of the content of the course (catalog description)

This professional training course offers the opportunity to the students of the career of Oceanography, to design a plan for the management of resources; for which it analyzes the tools of participatory planning and integrated coastal management. For the design of the management plan, we work with a coastal community, with which we analyze together the problems that must be handled in an integrated manner.

- b. Prerequisites

COASTAL RESOURCES MANAGEMENT I - OCEG1026

- c. This course is: Required

6. Specific goals for the course

- a. Specific outcomes of instruction

1.- Analyze participatory planning as a powerful tool for the self-definition of strategies that promote the sustainable use of coastal resources.

2.- Design participatory workshops, using the integrated management tools for the adequate collection of community contributions as fundamental elements in the design of the management plan.

3.- Elaborate in an orderly manner a document with the various elements of the management plan that serves as a guide for the community to achieve the objectives set during the community workshops

- b. Explicitly indicate which of the student outcomes listed in Criterion 3 or any other outcomes are addressed by the course

7. Brief list of topics to be covered

- 1.- Participatory strategic planning: theoretical foundations
- 2.- Tools for participatory strategic planning
- 3.- Integrated coastal management plan: issues and key players
